Projects Handled On Angular

ANGULAR PROJECT

Designation: Worked as a Angular Developer

June 2022 - Present

Roles and Responsibilities:

- Created components for UI using Angular Material Library
- Used Template driven form for Login and Signup Component.
- Used Reactive form for calculating the credit score of the user.
- Consumed HTTP API modules for binding data
- Optimized the frontend performance by applying best practices such as code splitting, lazy loading, and caching.
- Monitor and analyze website performance metrics (e.g., page load time, time to interact) to identify and address performance bottlenecks Overcame data integration challenges in the user module by implementing a custom API, ensuring accurate and up-to-date information to users.
- Contributed Ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements
- Used Fetch APIs for communication with backend and database and also created I Interactions using JavaScript.

Academic

- Completed BACHELOER OF SCIENCE from SRTMUN University, Nanded.
